Harbour Removal												
Biologic Control Release		Please note, some biological controls are operating naturally in the enviroment all year round										
Warren Implosion												

Please note: This annual control Calendar is based Victorian data, and should be used as a guide only.

Integrated rabbit control is essential for success: * Use more than one method of control .

**Coordinate control work with your neighbours. * Destroy the warren for greatest long-term impact on rabbit numbers. * Be more persistent than the rabbits!*

**Before using chemical products always read & understand the contents of the label & comply with all directions as specified on the label. * When using Phostoxin tablets for warren fumigation you must hold a Chemical Users Licence. * When using Pindone all deceased rabbits must be picked up daily to prevent secondary poisoning.*
